PROFESSIONAL OBJECTIVE

Motivated and detail-oriented Computer Science undergraduate (4th Year, 1st Semester) at St. Peter's Engineering College, JNTUH, seeking opportunities as a Web Developer and Data Analyst. Proficient in building full-stack web applications using React.js and RESTful APIs, with hands-on experience in data analytics, visualization using Power BI and Tableau, and AI-powered application development. Adept at collaborating in agile team environments and delivering scalable, user-centric solutions.

EDUCATION

Bachelor of Technology – Computer Science and Engineering | St. Peter's Engineering College (Autonomous), JNTUH
2023 – 2027

CGPA: 8.40 / 10.0 (till 3-2)

Intermediate (MPC) | Narayana Junior College
2021 – 2023

CGPA: 8.34 / 10.0

Secondary School Certificate (SSC) | Hindu Public School
2020 – 2021

CGPA: 7.8 / 10.0

TECHNICAL SKILLS

Programming & Web Development: Python, JavaScript, React.js, HTML5, CSS3, REST APIs, Swagger (OpenAPI)

Data Analytics & Visualization: Power BI, Tableau, Pandas, NumPy, Matplotlib, MS Excel

AI & APIs: Generative AI, Prompt Engineering, Suno API, Grok API, OpenAI API

Tools & Platforms: Git, GitHub, Streamlit, SQL

PROJECTS

Venue Booking Website | Team Project
2025

Tech Stack: React.js, Swagger (OpenAPI), REST APIs, HTML5, CSS3

- Designed and developed a full-stack venue booking platform catering to three user roles: Admin, Vendor, and End User, enabling seamless venue discovery, listing, and management.
- Built responsive, role-based dashboards for Admins (platform management), Vendors (venue posting, availability management), and Users (search, booking, and reviews).
- Integrated Swagger (OpenAPI) for backend API documentation and testing, ensuring reliable communication between frontend and backend services.
- Implemented AI-assisted features to enhance search and recommendation capabilities, improving user experience.
- Collaborated in an agile team environment, contributing to UI/UX design, component development, and API integration using React.js.

Musique AI – AI-Powered Music Generation Platform | Individual Project
2026

Tech Stack: React.js, Suno API, Grok API, HTML5, CSS3, JavaScript

- Developed a web-based AI music generation platform that enables content creators to generate copyright-free, royalty-free music from text prompts, at no cost.
- Integrated Suno API as the primary AI model for high-quality music synthesis from natural language prompts.
- Implemented Grok API as a fallback model to ensure platform reliability and uninterrupted music generation.
- Designed an intuitive, user-friendly interface using React.js, making AI music generation accessible to non-technical content creators.
- Targeted use case: background music generation for YouTube, social media, and podcast creators, eliminating copyright concerns.

INTERNSHIP & VIRTUAL EXPERIENCE

Data Analytics Intern – AICTE Microsoft Elevate Program | AICTE & Microsoft

2026

- Analyzed real-world datasets and performed end-to-end data cleaning, transformation, and preprocessing to prepare data for analysis.
- Built interactive Power BI dashboards to visualize key insights and metrics; final project submission focused on a Financial Inclusion Dashboard analyzing access to banking, credit, and digital financial services.
- Applied data storytelling techniques to translate raw data into actionable business insights, meeting program evaluation criteria and successfully completing the internship.

Cyber & Data Analytics Virtual Experience | Deloitte US (via Forage)

2025

- Analyzed security, access, and web activity logs to detect suspicious user behavior and potential cybersecurity threats.
- Built interactive Tableau dashboards to visualize security events and communicate analytical findings to stakeholders.
- Applied data interpretation and analytical reporting techniques to transform raw log data into investigation-ready intelligence.

CERTIFICATIONS

- Deloitte US – Data Analytics Virtual Experience (Forage)
- Deloitte US – Cybersecurity Virtual Experience (Forage)
- Developing Back-End Applications with Node.js & Express – IBM (Coursera)
- Foundations of Coding – Back-End – Microsoft (Coursera)
- AICTE Microsoft Elevate – Data Analytics Program (Completion Certificate)

ACHIEVEMENTS & CO-CURRICULAR ACTIVITIES

- Won the Gen AI Hackathon at St. Peter's Engineering College, competing against 600+ teams; recognized with an Achievement Certificate for developing an innovative Generative AI solution.
- Participated in Specathon Hackathon (500+ participants) at St. Peter's Engineering College as a Frontend Developer, building responsive UI components using HTML, CSS, and JavaScript.
- Attended a cybersecurity workshop covering fundamentals of network security, ethical hacking, and emerging cyber threats.
- Presented a seminar on Artificial Intelligence and Deep Learning, covering neural networks, model architectures, and real-world AI applications.
- Volunteer, NSS Blood Donation Camp – contributed to community health and social responsibility initiatives.
